

How to change the HWID number

The step as follow:

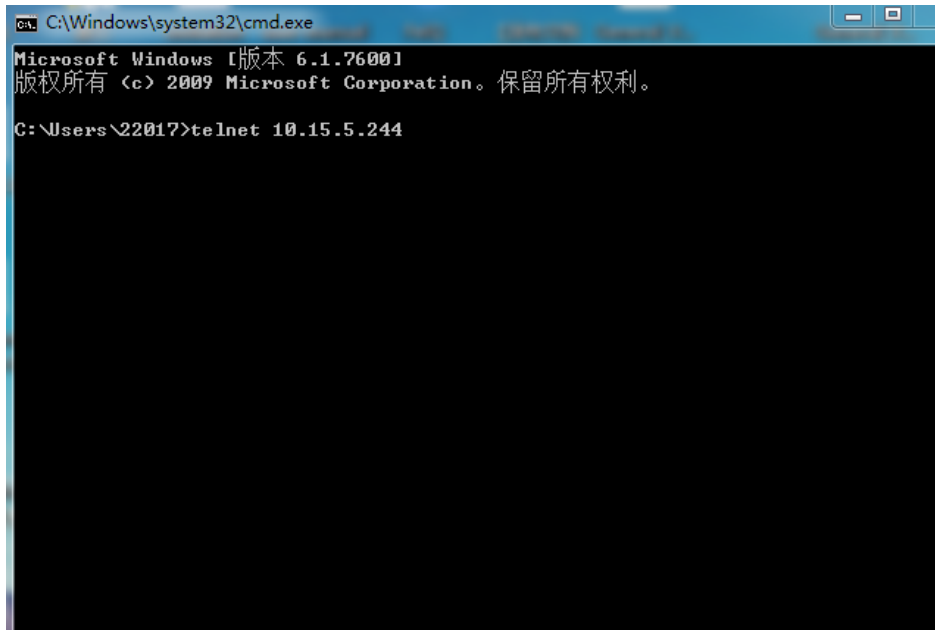

- 1、 Reset the configuration of the VTH, refer to the PDF file “Reset the configuration”
- 2、 Use config tool to upgrade the VTH version as blew:

 [General_VTH1510_Eng_P_V1.110.0000.0.R.20130629.bin](#)

- 3、 run ‘cmd’

Input ‘telnet’ device IP(e.g,10.15.5.244)

Then press ‘Enter’ key

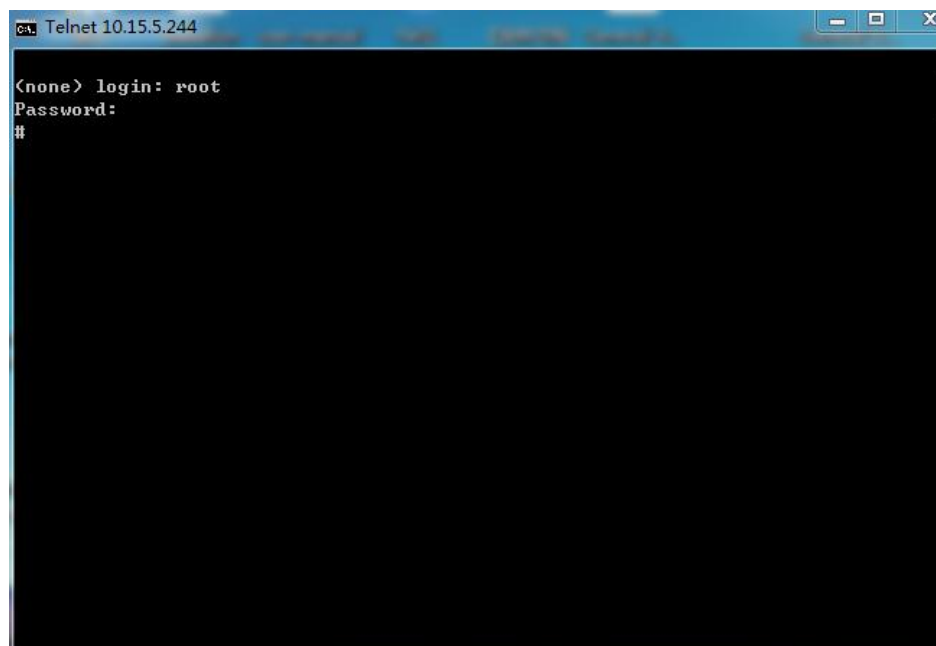

```
C:\Windows\system32\cmd.exe
Microsoft Windows [版本 6.1.7600]
版权所有 (c) 2009 Microsoft Corporation。保留所有权利。

C:\Users\22017>telnet 10.15.5.244
```

- 4、 username is: root

Password is: vizxv

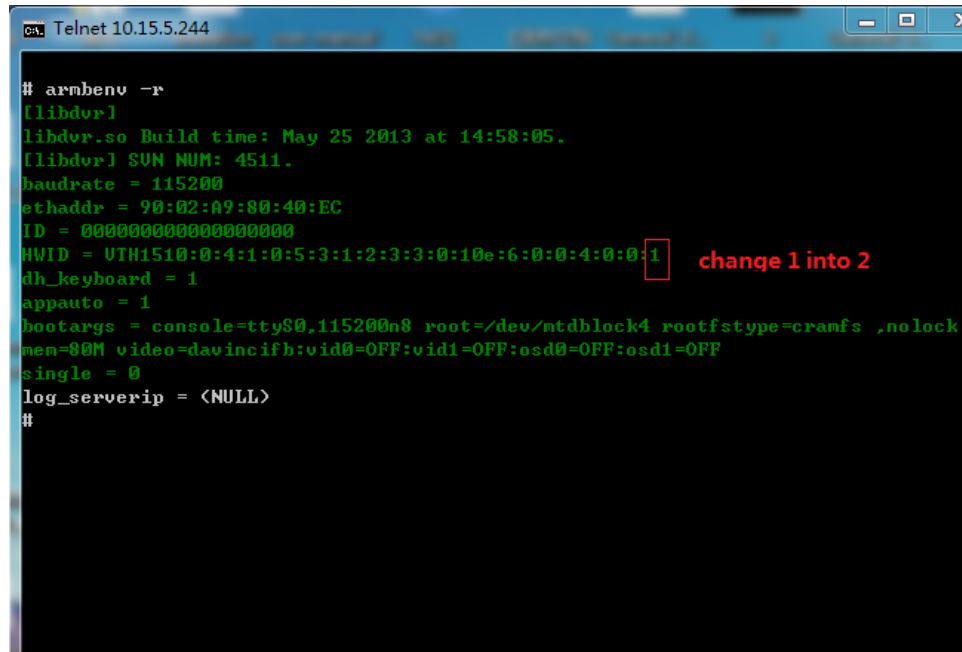

```
Telnet 10.15.5.244

<none> login: root
Password:
#
```

5、input the command as follow:

armbenv -r

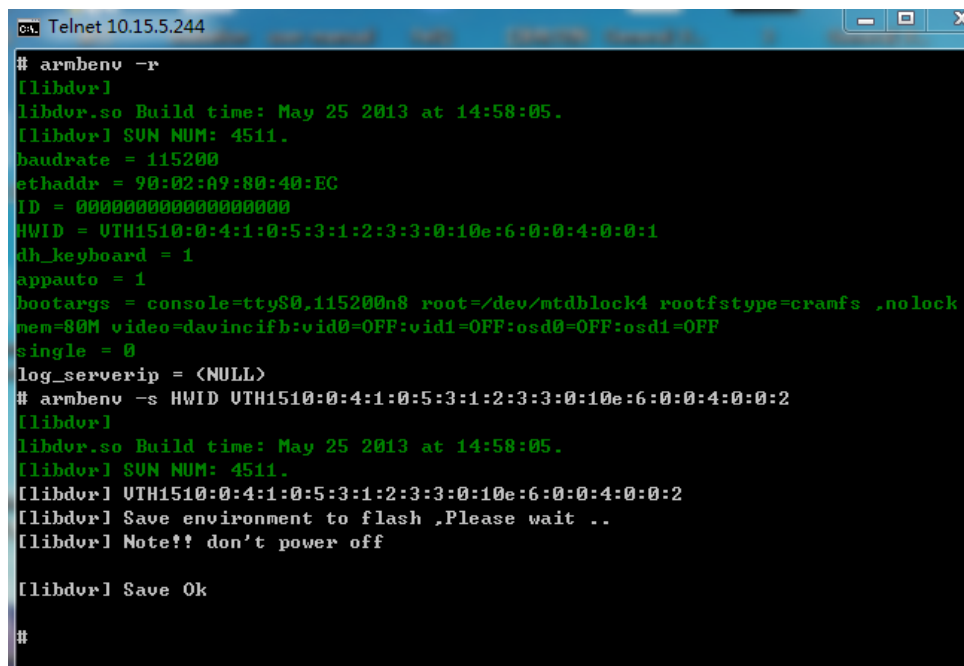

```
Telnet 10.15.5.244

# armbenv -r
[libdrv]
libdrv.so Build time: May 25 2013 at 14:58:05.
[libdrv] SUN NUM: 4511.
baudrate = 115200
ethaddr = 90:02:A9:80:40:EC
ID = 000000000000000000
HWID = UTH1510:0:4:1:0:5:3:1:2:3:3:0:10e:6:0:0:4:0:0:1
dh_keyboard = 1
appauto = 1
bootargs = console=ttyS0,115200n8 root=/dev/mtdblock4 rootfstype=cramfs ,nolock
mem=80M video=davinci fb:vid0=OFF:vid1=OFF:osd0=OFF:osd1=OFF
single = 0
log_serverip = <NULL>
#
```

6、Check the HWID info and change it, input the command:

armbenv -s HWID VTH1510:0:4:1:0:5:3:1:2:3:3:0:10e:6:0:0:4:0:0:2

```
Telnet 10.15.5.244

# armbenv -r
[libdrv]
libdrv.so Build time: May 25 2013 at 14:58:05.
[libdrv] SUN NUM: 4511.
baudrate = 115200
ethaddr = 90:02:A9:80:40:EC
