

below is the instruction on symbian phones for your reference:

STEP1: Firstly enable the network access on mobile phone. And then run Web browser.

STEP2: Input the DVR server's IP address in a new-built bookmark. Click this bookmark to connect to the DVR.

STEP3: A welcom window will pop up and requires a package. Click the software name to download.

STEP4: A security windows will pop up after downloading and ask if install the package. Click YES to install.

STEP5: A Scam shortcut icon appears on the system menu after finished.

STEP6: Run Scam program. It will enter a function interface.

Live view: to do mobile live view

Image view: to check the pictures snapped in live view

System setting: Login setting and Alarm setting.

Help: function indication and help

STEP7: Click System setting--->Login Setting to enter login interface.

STEP8: Input the server's address, ID and password respectively. And then save.

Notice: About AccessPoint, there may be different access points in different countries or from service providers.

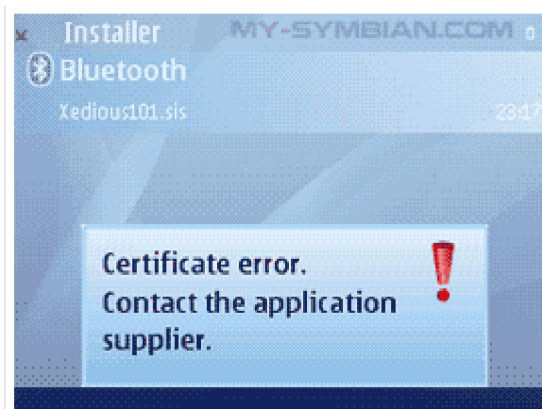

STEP9: Enter Live View, it will connect the server and display pictures.

STEP10: In Live View, users can do snapshot, change channels and control PTZ.

Notice: If you meet a “Certificate error” or similar error interface as below during downloading and installing SIS software on symbian phones, please enabled installation of unsigned SIS files.

Go to **Tools -> App. Manager**, choose **Options -> Settings** and set **Software installation** to **All** and **Online certif. check** to **Off**.
